GI Lab Assigned Clinic ID:

Phone:
Fax:
Animal Name: Simba
Owner Name: Austin
Species: Feline
Date Rec'd: 1/20/2009

GI Lab Accession: 289425

Test

Pancreatic Lipase Immunoreactivity Fasting

Result
6.3 ug/L

Control Range
0.1-3.5

Assay Date
01/20/09

Interpretation: NOTE: new Spec fPL reference range. Serum Spec fPL concentration is consistent with pancreatitis. The cat most likely has pancreatitis. Consider investigating for risk factors and concurrent diseases (e.g., IBD, hepatitis, Diabetes mellitus). Periodic monitoring of Spec fPL may help assess response to therapy.

Disclaimer:

“Lisa Taylor-Austin believes there was merit to her claims that Dr. Deforge negligently cared for her cat, Simba, and that he misrepresented whether he was a Board-certified dental specialist. Dr. Deforge denies these claims and asserts that the Department of Public Health’s veterinary board cleared him of any wrong doing. However, Dr Deforge agreed to pay \$7,500.00 to compensate Ms. Taylor-Austin because he believed the risks inherent in any lawsuit and the cost of missing two weeks from his practice made it imprudent to go to trial.”

Note: My guardian’s costs for my medical care and all legal avenues exceeded \$20,000.
